

CPS209 Lab 8

Exceptions & File IO

Preamble

In this lab you will practice opening files, reading from files, writing to files, and throwing, catching, and handling exceptions.

Homework to Complete (Submit on D2L):

See the accompanying file Lab8.java for methods stubs and descriptions.

Reminder

- Your methods should be SILENT. Print statements are fine for testing and debugging but remove them from your code before you submit.
- No method should take longer than a couple of seconds to pass the tester. Methods that take too long will be rejected. Writing efficient code is an important part of this course.

Submission

Labs are to be completed and submitted *individually*. Submit your completed **Lab8.java** on D2L, under the submission for Lab 8.
